

Lab 11 - Test Summary Report

App: Taskly | Student: Tran Nguyen Khanh (SE172279)

Command: flutter test test/unit test/widget test/integration

Result: All tests passed (11/11)

1. Overview

Full test suite for Taskly covers unit tests (model + repository), widget tests (list UI + navigation), and one end-to-end integration flow (add task -> open detail -> save updated title).

2. Suite layout

- test/unit/task_model_test.dart - Task defaults and toggle()
- test/unit/task_repository_test.dart - add / delete / update / unmodifiable list
- test/widget/task_list_widget_test.dart - empty state, add task, multiple tasks
- test/widget/task_navigation_test.dart - tap ListTile -> Task Detail
- test/integration/task_integration_test.dart - full update flow via MyApp

3. Results table

File	Type	Status	Cases
task_model_test.dart	Unit	PASS	2 (default, toggle)
task_repository_test.dart	Unit	PASS	4 (add, delete, update, list)
task_list_widget_test.dart	Widget	PASS	3 (empty, add, multi)
task_navigation_test.dart	Widget	PASS	1 (navigate to detail)
task_integration_test.dart	Integration	PASS	1 (add -> edit -> save)

4. What each layer verifies

- Unit: Task.completed defaults false; toggle flips state; repository CRUD and read-only tasks list.
- Widget: empty message, Add inserts titles into ListView, multiple tasks render.
- Navigation: seeded task opens Task Detail with detailTitleField key and correct title.
- Integration: empty -> add "Original title" -> detail edit to "Updated title" -> list shows update.

5. How to re-run

- Unit + widget: flutter test test/unit test/widget
- Integration: flutter test test/integration
- All: flutter test

6. Evidence note

Console output from this run: All tests passed! (+11). Optional screenshots of the test console can be attached later if the checklist asks for live capture images.

7. Conclusion

The Taskly test suite is complete and green. Unit, widget, and integration layers cover model logic, list UI, navigation, and the end-to-end edit flow required for Lab 11.
